

COOPERATIVE EUROPEAN GRAPEVINE MOTH (EGVM) QUARANTINE PROJECT COMPLIANCE AGREEMENT

EXHIBIT W3- HAULER/TRANSPORTER: Hand Harvested Fresh Wine Grapes Systems Approach

Provisions for the Intrastate and Interstate Movement of Hand Harvested Fresh Wine Grapes Produced Inside the EGVM State Interior Quarantine Area

Establishment shall only move regulated articles ***within or from*** the area quarantined for EGVM when complying with *all* of the following:

1. Fresh grapes grown inside the quarantine area shall only be transported from a **grower*** under compliance with the Project.
2. Shipments of grapes may not include any material other than grapes, such as: leaves, stems, litter, culls, etc. Grape bunches must be trimmed clear of all material other than grapes.
3. Ensure shipments of grapes destined for re-packing or processing ***at locations other than the field are:***
 - a) accompanied by a copy of the Certificate of Quarantine Compliance (CQC), issued to the grower at the time of inspection, *and*
 - b) received by an approved **receiver**.*
4. Establishment must make a copy of the CQC available upon request by the Project.
5. Fresh grapes must be transported to final destination in refrigerated conveyances.
6. Ensure a copy of the Certificate (Federal Shield) accompanies each qualifying **interstate** shipment of grapes.
7. Provide a copy of the CQC and/or Certificate (Federal Shield) to the **receiver***.
8. Transport of *uninspected* fresh grapes or fresh grapes *subject to treatment* is not authorized under the provisions of this Compliance Agreement exhibit.
9. Fresh grapes must receive a Project approved **post-harvest treatment*** when harvested from any vineyard:
 - a) with EGVM detected by trapping or inspection within the last three EGVM generations, **or**
 - b) located within 200 meters from the boundary of a vineyard with EGVM detected by trapping or inspection within the last three EGVM generations, **or**
 - c) located within 200 meters of an EGVM detection by trapping or inspection within the last three EGVM generations (including find sites in residential areas, orchards, fields, groves, etc.). **or**
 - d) located within 500 meters from the boundary of a vineyard with EGVM detected by trapping or inspection within the last three EGVM generations in areas where mating disruption is being used, **or**
 - e) located within 500 meters of an EGVM detection by trapping or inspection within the last three EGVM generations (including find sites in residential areas, orchards, fields, groves, etc.) where mating disruption is being used.

Project approved post-harvest treatment is required until there are no additional EGVM detections by trapping or inspection for three consecutive EGVM generations. **Project will notify grower of EGVM detections.***

10. Ensure the exterior of all vehicles, conveyances and equipment (bins, barrels, machinery, gondolas, etc.) is thoroughly cleaned of all host material and debris prior to leaving the growing premise for transit and prior to leaving the receiving facility.
11. Ensure all employees receive training to be compliant with all specifications of this compliance agreement exhibit.
12. Ensure a copy of this compliance agreement and this exhibit are inside each vehicle during transit.

****Project approved growers, receivers and post-harvest treatments can be verified online at:***
http://www.cdfa.ca.gov/phpps/PE/InteriorExclusion/egvm_quarantine.html

Shipments found to be in violation of the above stipulations are subject to being held, rejected, destroyed, or subject to other prescribed actions at the discretion of the Project.
